[FAQ#39;s General Tanning - Tanforless](#)
A natural tan takes 24-48 hours to develop. The tanning process occurs within the epidermis when melanocyte cells are stimulated by ultraviolet light that causes them to produce the pigment melanin.

You can leave it on your skin for 1-8 hours depending on how dark you'd like to go (the longer you leave it on, the darker it will go) and rinse it off in a lukewarm 45 second shower. The tan will then continue to deepen over the next 12-24 hours.
