On November 1, 2008, Nintendo released the Nintendo DSi, another redesign with several 🍊 hardware improvements and new features, although it lost backwards compatibility for Game Boy Advance titles and a few DS games 🍊 that used the GBA slot. On November 21, 2009, Nintendo released the Nintendo DSi XL, a larger version of the 🍊 DSi.äAll Nintendo DS models combined have sold 154.02 million units,[10] making it the best-selling Nintendo system, the best-selling handheld game 🍊 console, and the second-best-selling video game console of all time, overall, behind Sony's PlayStation 2 [21][11] The Nintendo DS was succeeded 🍊
