<p>Terrible game.</p>

<p>I just bought this, as I was looking for a game that is exactly this pr

emise. Alas, when I found this game, I bought it and I was extremely disappointe

d. Just loading up the game took forever, and I kept having to close and reopen

it. When it finally opened, it took 17 minutes just to do that. Yeah. Now it'

;s not like I have a terrible laptop, my laptop is really good and I've neve

r had any issues with such a thing. Then, upon opening the game, I couldn't

look around because the default settings were set to ultra. For the record, I do

n't really have an issue with game devs doing this, but it leaves a bitter t

aste in your mouth. I had to set the quality to very low and even then it was st

ill so laggy. It was 2 fps at the most (like, not stretching the truth here, it) Tj T* BT /F1 12

pixels. The game was also very repetitive, so even if you have a NASA super-comp

uter you will get bored of this really quickly. I do not suggest this to anyone,

no matter how enticing it looks. It was terrible and so incredibly frustrating;

especially because I kept having to meddle with the settings and make the game

actually playable (spoiler alert: I couldn't make it playable). Maybe if you

have a NASA computer and also happen to have amnesia this game would be quite e

njoyable, but unfortunately I see a lot of people having the same disappointment

as I am. I really wish I could have this refunded, even just half of the money

I spent on this. I'm unsure if Steam would let that happen, so for now I jus

t suggest you don't get this game unless you get it free somehow.</p>
