As features of Call Of Duty games like Modern Warfare offer the split Screen feature, it's important to note that the split screen feature is not available in all Call Of Duty games. For example, Call Of Duty: Warzone does not support split screen. However, Call Of Duty: Modern Warfare does support split screen. To enable split screen in Call Of Duty: Modern Warfare, you need to go to the game's settings menu and enable the split screen feature. Once you have enabled the split screen feature, you can play the game with a friend. To play with a friend, you need to have a second controller connected to your console. Once you have a second controller connected, you can press the 'Share' button on the controller to bring up the split screen menu. From there, you can select 'Split Screen' and then 'Local' to play with a friend. Once you have selected 'Split Screen' and 'Local', you can press the 'Share' button again to start the game. The game will then load in split screen mode. To disable split screen, you can go back to the settings menu and disable the split screen feature. Alternatively, you can press the 'Share' button while in the game to bring up the split screen menu and select 'Off' to disable split screen. It's important to note that split screen is only available in local play. Online play does not support split screen. If you want to play with a friend online, you need to use a second console. In summary, split screen is a feature that allows you to play Call Of Duty games with a friend on the same console. To enable split screen, you need to go to the game's settings menu and enable the split screen feature. Once you have enabled the split screen feature, you can play the game with a friend. To play with a friend, you need to have a second controller connected to your console. Once you have a second controller connected, you can press the 'Share' button on the controller to bring up the split screen menu. From there, you can select 'Split Screen' and then 'Local' to play with a friend. Once you have selected 'Split Screen' and 'Local', you can press the 'Share' button again to start the game.
