&lt;p&gt;&lt;/p&gt;&lt;p&gt;To fully exploit the constrained width, avoid loadin  
g the neighbouring structures and straddle shared utilities running under the si  
te, the 7 , £ house was constructed using a lightweight steel frame on a piled sl  
ab. The steelwork was prefabricated as a series of 7 , £ portal frames that were  
craned down the alley and site-welded together. Given that every inch in such a  
narrow space 7 , £ was valuable we chose to fully weld the connections and expres  
s the frame internally, even utilising the depth of the 7 , £ steels to maximise  
the space.&lt;/p&gt;  
&lt;p&gt;Alongside the painted steel a simple palette of spruce plywood, douglas  
fir joists, terrazzo and cork 7 , £ flooring enriches the interior. Externally t  
he timber framed walls are clad in handmade pewter glazed brick slips with a pat  
ina 7 , £ that reflects the changing light of the sky. Both the simply landscaped  
and planted rear courtyard and the garden in 7 , £ front of the house enhance th  
e feeling of space in this small dwelling.&lt;/p&gt;  
&lt;p&gt;This self-build project had a long gestation, fitted 7 , £ in around pro  
fessional and family life. The design and construction were developed as time an  
d money allowed so whilst planning 7 , £ consent was given in January 2014 and th  
e ground works commenced in the spring of 2024, the building was not 7 , £ comple  
ted until August 2024. We worked closely with friend and joiner Michael Tye to l  
ead a small team of local 7 , £ subcontractors and employed specialist fabricator  
s for certain key packages as well as undertaking a fair amount of the work ours
