Fruit Ninja is an arcade game where you have to swipe and slash your way through all kinds of fruit, from pears and apples, to coconuts and bananas. Aim for the highest score by slicing multiple fruits at once and build up your combo to surpass everyone else! You can also get huge scores from critically striking the fruit so be strategic with your swiping. However, beware of the bombs! Hitting one of them

Percutaneous endoscopic gastrostomy (PEG) is a type of feeding tube which is inserted through the skin of the abdomen into the stomach during an endoscopy. You may need a PEG if food, drink and medicines cannot reach your stomach (for example, if you can't swallow)

It can be put in via two methods: PEG or RIG. PEG stands for Percutaneous Endoscopic Gastrostomy - inserted via a telescope down the food pipe. RIG stands for Radiologically Inserted Gastrostomy - inserted using X-ray guidance after having barium placed inside the stomach.

Guide to PEG/RIG - Oxford University Hospitals
