Formaldehyde, also known as methanal, is an organic
chemical compound and belongs to the aldehyde group of substances. Due to its v
ersatile applicability, it can be found in a large number of different products.

It is mainly used as an adhesive and binder in the construction mat
erials and furniture industry

Adhesive Bonding is the process of joining two su
rfaces together, usually with the creation of a smooth bond. This may involve th
e use of glue, epoxy, or one of a wide range of plastic agents</s
pan> which bond either through the evaporation of a solvent or through curing
via heat, time, or pressure.</div></div></div></div><div>
