[How to Hide Apps on an Android Phone - Avast](#) : c-hide-apps-android

Open Secure Folder on your home screen and tap + (the plus icon). Select the apps you want to hide and they'll move to the Secure Folder.

Go to Settings > Security and privacy > Secure Folder. Sign in or create the folder with your Samsung account.

Open the Shortcuts app on your iPhone (it's already preinstalled).

Tap the plus icon in the top right corner.
